

DUST COLLECTORS

M - 2

DUST COLLECTORS

THE DUST COLLECTION EQUIPMENT:

The M-2 model collector is of Larry Hess & Associates own design and manufacture. It is a cartridge type with auto cartridge cleaning and is designed and built for continuous duty operation. The unit is designed for use with abrasive blast systems.

AIR FLOW: 400 / 700 CFM

SIZE: Approximately 36 " L x 18 " W x 80" H.
with legs for 5 gal. dust drum.

ASSEMBLY: The collector is assembled at the factory and will be shipped in one section.

CONSTRUCTION: Standard construction of the unit is 11 gauge hot rolled steel, reinforced to maintain structural integrity to 15" w.g.. All wiring, air piping, solenoids and valves are mounted externally. Inlet size is 6" .

FILTER CARTRIDGES: Filters are replaceable cartridges. Each filter has approximately 103 sq. ft of filter media.
