

Large Series Ultrasonic Cleaning System
MODEL #L-174-26-SP

Tank sizes range from 36"x25" to 212"x58". Heavy workloads, long duty cycles, and aggressive chemistry are characteristic of this systems performance. Optional transfer holding tanks provide a cost-effective means for ultrasonic rinsing. Can clean components weighing thousands of pounds.

Nearfield[®] Strip Cleaning System
MODEL #SC-3 WITH INFRARED DRYER

Capable of handling a wide range of products from 3" to 50" wide, .0004 to 3" thick, and speeds up to 360 feet per minute. Typically utilized prior to electron beam or laser welding, prior to plating or painting, and for removal of oxide/carbon and drawing lubricants.

Turbine Engine Fuel Nozzle Cleaning System
MODEL #FNC-500

Our industry specified systems remove burnt fuel/coking from internal and external surfaces of complete engine sets of nozzles. Also available, a complete line of equipment for turbine overhaul including debrazing systems, pre & post F.P.I. washers and general maintenance.
