

# B-400 Burnishing Compound

**B-400 Burnishing Compound is a general purpose burnishing compound. It produces a bright finish, with excellent color on a wide variety of ferrous and non-ferrous metals. This product was specifically formulated with added detergency to handle more soil than traditional burnishing compounds. This helps produce lighter, brighter finishes and less chance of impingement due to soil loads and long cycle times**

## PHYSICAL PROPERTIES

Appearance	Beige Powder
pH @ 1% solution	9.1
Odor	Mild
Foaming Action	Moderate
Solubility in Water	Partial
Rinsing Action	Excellent
Metal Safety	All Metals
Bulk Density	40 lbs/cu.ft.
Standard Container	300 lb Drum

*Refer to our Material Safety Data Sheet for additional information.*

## USAGE AND DILUTION RECOMMENDATIONS

Use 1 to 4 ounces per gallon in rotary barrel finishing operations. Water to mass ratios will affect the type of finish produced. This product may be used with a wide variety of media or part on part.

## HANDLING AND STORAGE

Use good industrial hygiene methods such as wearing gloves, impermeable apron, eye protection and washing after handling product. Store product in a cool dry place. Closing plastic liner when not in use will help prevent caking. Rotate stock. When stored as stated above, shelf life is a minimum of 2 years.

*Progress Chemical guarantees its products will perform to your satisfaction when used in accordance to our recommendations. We back this guarantee with over 65 years experience. Our quality management system has been certified to ISO 9001 Quality Standards.*
